SECTION C DESCRIPTIONS AND SPECIFICATIONS

PERFORMANCE WORK STATEMENT (PWS)

ONLINE AFLOAT SAFETY CLIMATE ASSESSMENT SURVEY (ASCAS)

SUPPORT SERVICES

IN SUPPORT OF

COMMANDER NAVAL SURFACE FORCE PACIFIC/

COMMANDER NAVAL SURFACE FORCE ATLANTIC

1. **GENERAL:** This is a non-personal services contract to provide Online Afloat Safety Climate Assessment Survey support services in support of Commander Naval Surface Force Pacific (COMNAVSURFPAC – a.k.a. CNSP) and Commander Naval Surface Force Atlantic (COMNAVSURFLANT – a.k.a. CNSL). The Government shall not exercise any supervision or control over the contract service providers performing the services herein. Such contract service providers shall be accountable solely to the Contractor who, in turn is responsible to the Government.

1.1 **Description of Services/Introduction:** The contractor shall provide all the expertise, personnel, equipment, supplies, facilities, transportation, materials, supervision, and other items and non-personal services necessary to provide Online Afloat Safety Climate Assessment Survey (ASCAS) support services as defined in this Performance Work Statement except for those items specified as government furnished property and services. The contractor shall perform to the standards in this contract.

1.2 **Background:** Commander, Naval Surface Forces mans, trains and equips the Surface fleet in support of warfighting as their number one priority. Mission success is relative to the accuracy, precision, safety, efficiency and confidence to accomplish missions and the ability to master the material, tactical and watch team proficiency requirements integral to operations at sea. To be more effective, Commanding Officers (COs) need a survey that assesses command climate in terms of crew proficiency in the six pillars of operational excellence (i.e. procedural compliance, integrity, formality, level of knowledge, questioning attitude, forceful team backup) and use of the three methods (i.e. operational risk management, Plan-Brief-Execute-Debrief model, and mishap/hazard reporting). These principles are prescribed for use and defined in COMNAVSURFPACINST and COMNAVSURFLANTINST 5100.1A.

The surveys allowed Commanding Officers assess climate and behavior to identify strengths and weaknesses across the pillars of operational excellence, which may be reinforced through leadership, policy changes, training and/or discipline. An Online survey that can assess the level of Safety Climate provides the Commanding Officer the ability to engage at the right time with the right level of effort and to effect positive changes.

The Survey assesses the perceptions of Navy and Marine sea-duty personnel on issues associated with operational safety and risk management. The surveys serve two primary purposes: (1) they provide unit commanders with timely feedback on safety issues so they may better focus their mishap prevention efforts, and (2) they collect data which is analyzed in the areas of human factors and organizational behavior which could lead to the development of more effective mishap-potential metrics and prevention policies by the Navy.

An example of how this survey benefits a Commanding Officer would reveal that the crew does not possess the appropriate level of knowledge in ship handling and that the CO could directly use this information in his training plans, while the Type Commander could then be prompted to review existing navigation training curriculum and scheduling. Another example is a Commanding Officer determination through the survey that the crew lacks team cohesion and rarely provides backup during shipboard evolutions, creating unnecessary risks. The CO then mitigates risk by actively encouraging a questioning attitude of the crew during execution of key events.

The survey should be able to identify similar problems so that leadership on board and at the TYCOM level can determine efforts needed and implement corrective actions (including Afloat Culture Workshops and specific unit-level best practices gleaned from the surveys of multiple ships and other operational units over the years).

In summary, the desired survey outcome includes identification of cultural and behavioral norms that exist in contrast to effectively employing the six pillars of operational excellence and the three methods.

There is no organic expertise in CNSP/CNSL to perform this requirement, hence the necessity for contractual support.

1.3 **Objectives:** To provide an efficient and effective Online Afloat Safety Climate Assessment Survey (ASCAS) support services that provides timely data to Surface Force Commanding Officers for use in improvement in command's operational,

Note: Survey refinement is incorporating changes to the survey for the purpose of improving its ability to promptly and accurately assess existing command's safety climate. Survey refinement may be initiated by the contractor. It may also be initiated by the COR with collaboration of the contractor PSME. Generally 2-4 refinements per year are required. Shifts in tasking from Combatant Commanders (in response to World events), and lessons learned from completed surveys will dictate how many refinements will be required. The changes that may be required in the survey is to adapt to the changing environment of commands that are deployed, commands that are training for deployment, as well as commands returning home from deployments that are longer than normal (e.g. changes necessary to accommodate a Carrier Strike Group/Amphibious Readiness Group on a 10 month deployment, after having only 6 months off from a 6 month deployment).

N00244H001 TRUSTWORTHINESS SECURITY - NAVY CONTRACT/TASK ORDERS (MAY 2004) (FLCSD)

Purpose: Reference is hereby made to Navy awarded contracts requiring contractor access to Navy information systems, sensitive unclassified information or areas critical to the operations of the command. Although these contracts are not classified and therefore contractor employees are not required to have obtained a National Agency Check (NAC) trustworthiness determination, the Department of the Navy (DON) has determined that all DON information systems are sensitive regardless of whether the information is classified or unclassified. Contractors whose work involves access to sensitive unclassified information warrants a judgement of an employee's trustworthiness. Therefore, all personnel accessing DON computer systems must undergo a National Agency Check to verify their trustworthiness. Also, Commands will include Facility Access Determination (FAD) program requirements in the contract specifications when trustworthiness determinations will be required on the contractor

CONTRACT NO. N00178-10-D-6273	DELIVERY ORDER NO. N00178-10-D-6273-NW01	AMENDMENT/MODIFICATION NO. 03	PAGE 17 of 22	FINAL

employees. The following addresses those requirements for Trustworthiness Security:

- Each contractor employee will have a favorably completed National Agency Check (NAC).
- If contractor personnel currently have a favorably adjudicated NAC the contractor will notify the Security Manager of the command they will visit utilizing OPNAV 5521/27 Visit Request form. The visit request will be renewed annually or for the duration of the contract if less than one year.
- If no previous investigation exists the contractor personnel will complete the requirement for a Trustworthiness NAC.
- In accordance with NAVSUPINST 5239.1A, if the contractor employee is a Foreign National prior approval of the Network Security Officer (NSO) is required. Access may be granted to Foreign Nationals who have a need to know and at least one of the following applies:

- (a) Foreign National is employed by DOD, or
- (b) Foreign National possesses a current Functional Accreditation approved by the Navy International Program Office (NAVIPO), or
- (c) Foreign National possesses a current Visit Request Form (OPNAV 5521/27 (1-73) as defined in OPNAVINST 5510.1H), which is on file with the requesting activity.

The Trustworthiness NAC is processed through the command Security Manager. The NAC will be processed through the use of the Electronic Personnel Security Questionnaire (EPSQ) SF 85P. The EPSQ software can be downloaded at the Defense Security Service (DSS) website <http://www.dss.mil/epsq/index.htm>. The contractor should provide the completed EPSQ electronically (electronic mail/diskette) to the Command Security Manager along with the original signed release statements and two applicant fingerprint cards (FD 258). The responsibility for providing the fingerprint cards rests with the contractor. The Security Manager will review the form for completeness, accuracy and suitability issues. The completed SF 85P along with attachments will be forwarded to (DSS) who will conduct the NAC.

The Department of the Navy Central Adjudication Facility will provide the completed investigation to the requesting command security manager for the trustworthiness determination. The command will provide written notification to the contractor advising whether or not the contractor employee will be admitted to command areas or be provided access to unclassified but sensitive business information.

Trustworthiness determinations are the sole prerogative of the commanding officer of the sponsor activity. If the commanding officer determines, upon review of the investigation, that allowing a person to perform certain duties or access to certain areas, would pose an unacceptable risk, that decision is final. No due process procedures are required. The contractor employee shall take all lawful steps available to ensure that information provided or generated pursuant to this arrangement is protected from further disclosure unless the agency provides written consent to such disclosure.
